PROJECTS

CareSync — AI-Powered Doctor Appointment System

Feb 2026 – Apr 2026

React.js, Node.js, Express.js, MongoDB, JWT, Google Gemini API

- Developed a production-grade MERN application supporting patient, doctor, and admin-level workflows at scale.
- Designed optimized REST APIs for appointment booking, queue management, prescriptions, and medical records, reducing API response time by 30%.
- Integrated Google Gemini API to deliver intelligent AI-assisted features and real-time telemedicine capabilities, cutting frontend load time by 40% through code splitting and lazy loading.

Inventory Management System

Dec 2025 – Feb 2026

React.js, Vite, Redux Toolkit, Ant Design, Node.js, Express.js, MongoDB, JWT

- Engineered a scalable full-stack web application with dynamic product tracking and order management workflows, cutting frontend load time by 20% through code splitting and lazy loading.
- Architected RESTful backend services using Express and MongoDB, ensuring high performance and data reliability.
- Implemented JWT authentication and role-based access control (RBAC) to secure all sensitive business operations.

OD Approval System

Oct 2025 – Dec 2025

React.js, Node.js, Express.js, MongoDB

- Built a MERN-based platform to streamline the On-Duty clearance process for students, mentors, and parents.
- Designed role-based workflows for multi-party approval, reducing manual processing time and administrative overhead.
- Delivered a responsive, scalable interface supporting real-time status tracking across student, mentor, and parent roles.

EDUCATION

B.Tech – Biotechnology, Bannari Amman Institute of Technology

2022 – 2026

CGPA: 8.0 / 10

Senior Secondary (XII), SRV Matric Hr. Sec. School

2021 – 2022

Score: 85%

Secondary (X), SRV Matric Hr. Sec. School

2019 – 2020

Score: 96%
