BALAJI H

SOFTWARE ENGINEER | FULL STACK DEVELOPER — MERN | AI INTEGRATION

+91 9677674828 | balaji.hdev@gmail.com | linkedin.com/in/balaji-h-a15845267 | github.com/BalajiHariharan30 | Portfolio | Trichy, Tamil Nadu

PROFESSIONAL SUMMARY

Full-stack developer specializing in secure, performance-optimized web applications built on the MERN stack. Delivered three production-grade systems, including an AI-powered telemedicine platform achieving a 400ms average API response time and an 89 Lighthouse performance score, and a multi-tenant SaaS platform featuring real-time, statistically-driven anomaly detection. Proficient in REST API design, JWT/RBAC security, and AI integration using the Google Gemini API. Brings a strong analytical foundation from a biotechnology background, applied to systematic debugging, testing, and architectural decision-making.

INTERNSHIP

Software Engineer Intern (Full-Stack Development) — Codomax Digital Solutions **July 2026 – Aug 2026**

- Built full-stack features for a Hospital Management System using React.js, Node.js/Express, and MongoDB, including JWT authentication and RBAC for secure data access.
- Developed REST APIs and integrated AI-powered features to automate workflows and enhance user experience, following Agile sprint-based development practices.
- Transitioned from a Biotechnology background into full-stack development, applying core CS fundamentals across frontend, backend, and database layers.

TECHNICAL SKILLS

Java | **React.js / Redux Toolkit** | **Node.js / Express.js** | **MongoDB / Redis** | **JWT Auth & RBAC** | **Google Gemini API**

Languages: Java, JavaScript, SQL
Frontend: React.js, Redux Toolkit, Vite, HTML5, CSS3, Ant Design
Backend: Node.js, Express.js, Spring Boot, REST API Design
Database & Caching: MongoDB, MySQL, Redis
Auth & Security: JWT, Role-Based Access Control (RBAC)
Real-Time: Socket.io, WebSockets
DevOps: Git, GitHub Actions (CI/CD), Vercel
Testing: Jest, Supertest, Vitest, React Testing Library
AI Integration: Google Gemini API

PROJECTS

CareSync — AI-Powered Doctor Appointment System **May 2026 – June 2026**
GitHub | Live Demo
React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, RBAC, Google Gemini API

- Developed a full-featured web application supporting patient, doctor, and admin-level workflows for booking, records, and prescriptions.
- Designed optimized REST APIs for appointment booking, queue management, prescriptions, and medical records, achieving an average API response time of 400ms, verified via Chrome DevTools Network panel.
- Achieved a Lighthouse Performance score of 89 with a Largest Contentful Paint of 0.82s through code splitting and lazy loading.
- Integrated Google Gemini API to deliver intelligent AI-assisted features and real-time telemedicine capabilities.
- Deployed the application on Vercel with continuous deployment from GitHub, ensuring fast global load times and zero-downtime updates.
- Ensured application reliability with unit and integration tests using Jest, Supertest, Vitest, and React Testing Library.

InsightOps — AI-Powered Inventory & Expense Management Platform **March 2026 – April 2026**
GitHub | Live Demo
React.js, Node.js, Express.js, MongoDB, Redis, Socket.io, JWT, RBAC, Google Gemini API

- Built a multi-tenant SaaS platform for inventory and expense management, ensuring complete data isolation across organizations using scoped middleware.
- Implemented a real-time anomaly detection system using Z-score statistical analysis to automatically flag unusual expenses for admin review.
- Integrated Google Gemini API to enable natural language search, converting plain English questions into secure, sandboxed database queries with dynamic table/chart results.
- Used Socket.io to power real-time notifications, instantly alerting admins to anomalies and inventory changes without requiring a page refresh.

ReserveX — Premium Ticket Booking Platform **Oct 2025 – Dec 2025**
GitHub
React.js, Redux, Node.js, Express.js, MongoDB, Socket.io, JWT, RBAC

- Built a MERN ticket booking platform with real-time seat locking via Socket.io and atomic concurrency control to prevent double-bookings.
- Implemented three-tier RBAC (User, Manager, Admin) with secured REST APIs, a custom promo engine, and Recharts-based analytics dashboards.
- Designed a responsive, glassmorphic UI with Google Sign-In, GPS-based location detection, and UPI QR code checkout.

EDUCATION

B.Tech – Biotechnology, Bannari Amman Institute of Technology **Passed out 2026**
CGPA: 8.0 / 10

Senior Secondary (XII), SRV Matric Hr. Sec. School **2021 – 2022**
Score: 85%

Secondary (X), SRV Matric Hr. Sec. School **2019 – 2020**
Score: 96%

CERTIFICATIONS

- Agentic AI Certified Foundations Associate — Oracle, July 2026
- Full Stack Development — GUVI x HCL, May 2026

ACHIEVEMENTS & LEADERSHIP

- Winner, SRM TechSpectrum '25 — recognized for full-stack project excellence.
- Mentored 50+ students in React and Java as a Technical Trainer.
- Served as Event Head for LEO-FEST and AURA'25, leading end-to-end technical operations including logistics, AV/technical setup, and cross-team coordination.
